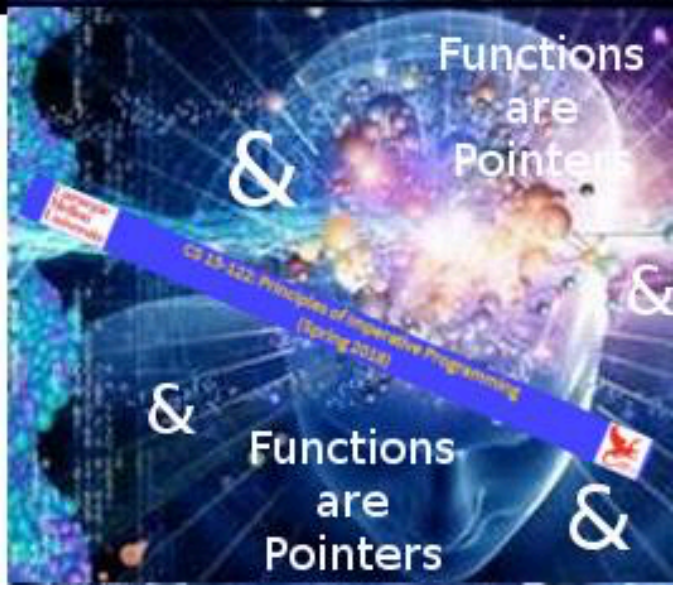
I’m an SCS Junior. I promise nothing except non-OC (i.e. plagiarized) memes and a super cringy campaign platform.

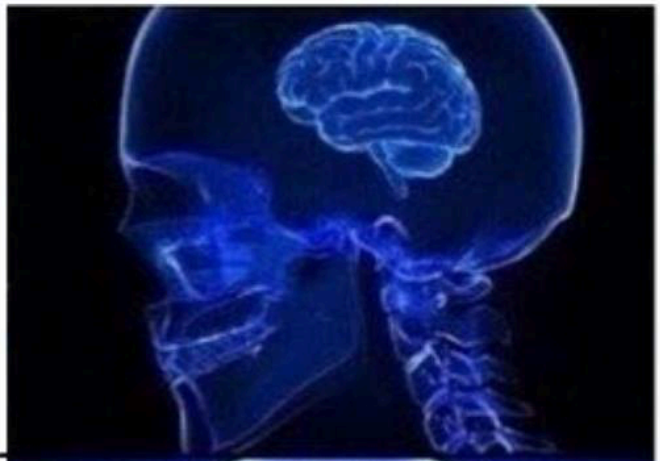
Coming up with your own funky-fresh dank memes

Reposting memes you found on the internet

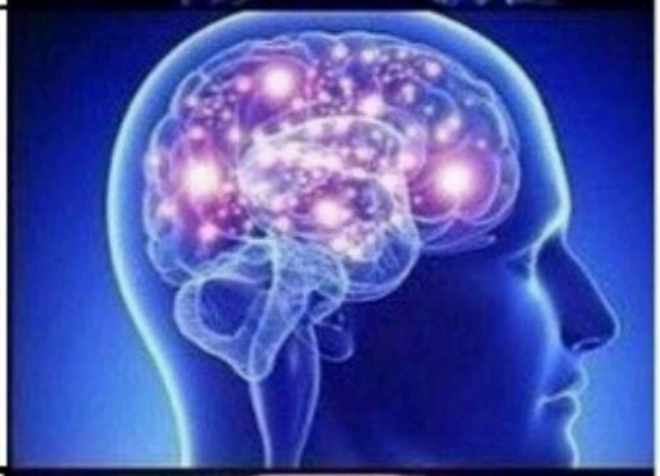
Lazily copying someone else's meme and pretending it's a thing



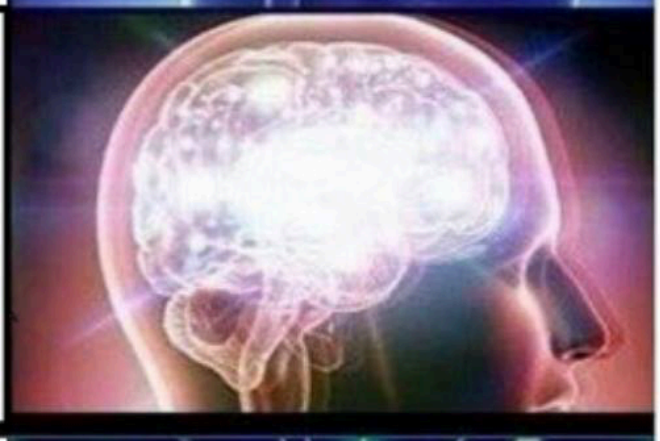
Waiting for the beep boops to cross the street



Anticipating the beep boops and hearing them start mid stride

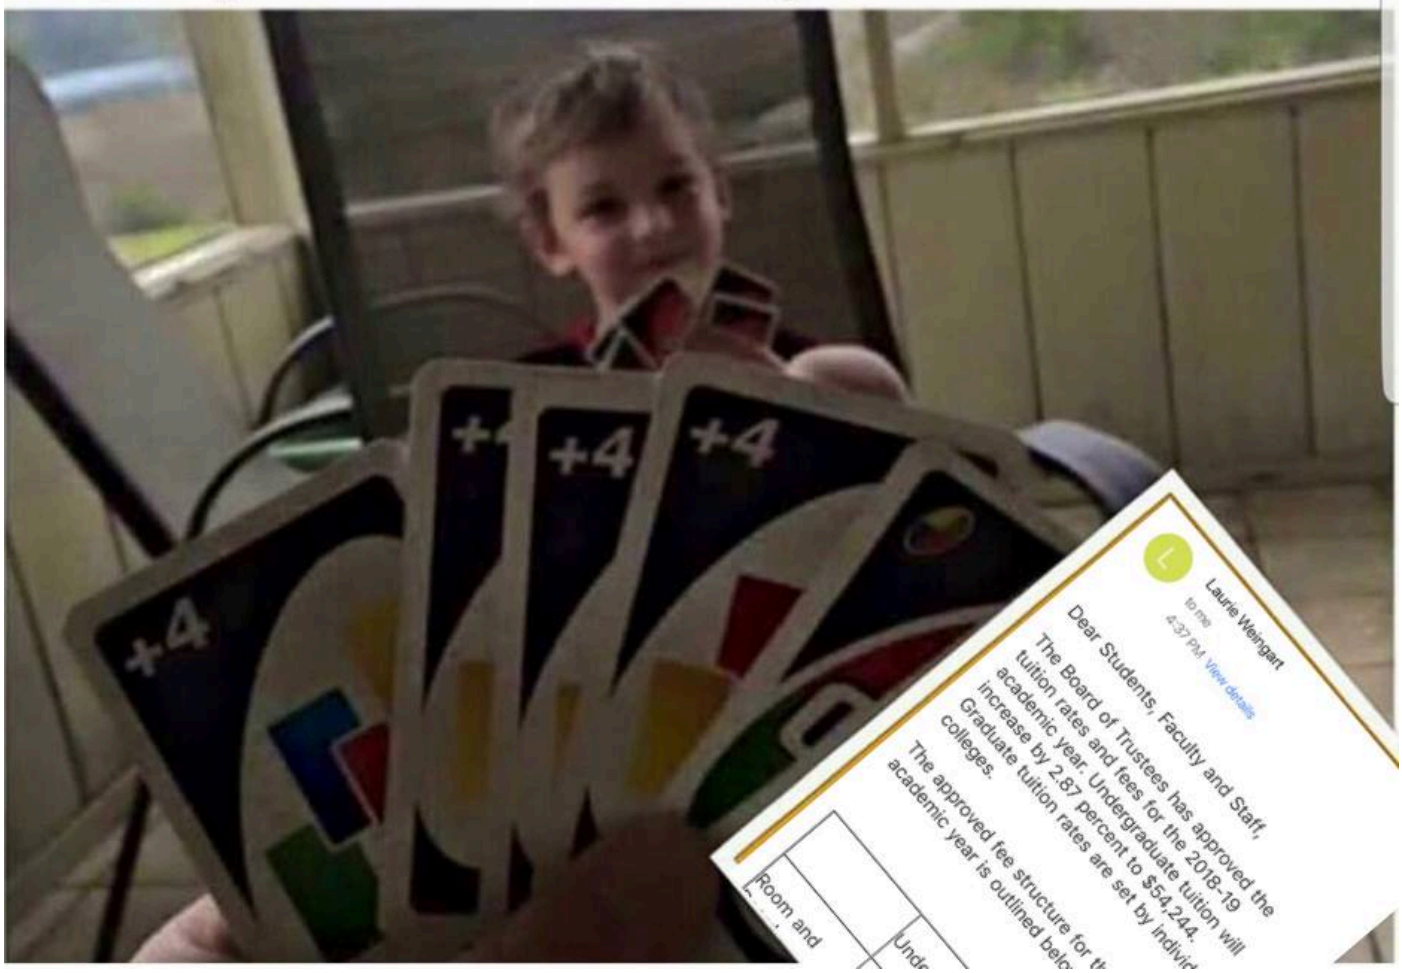


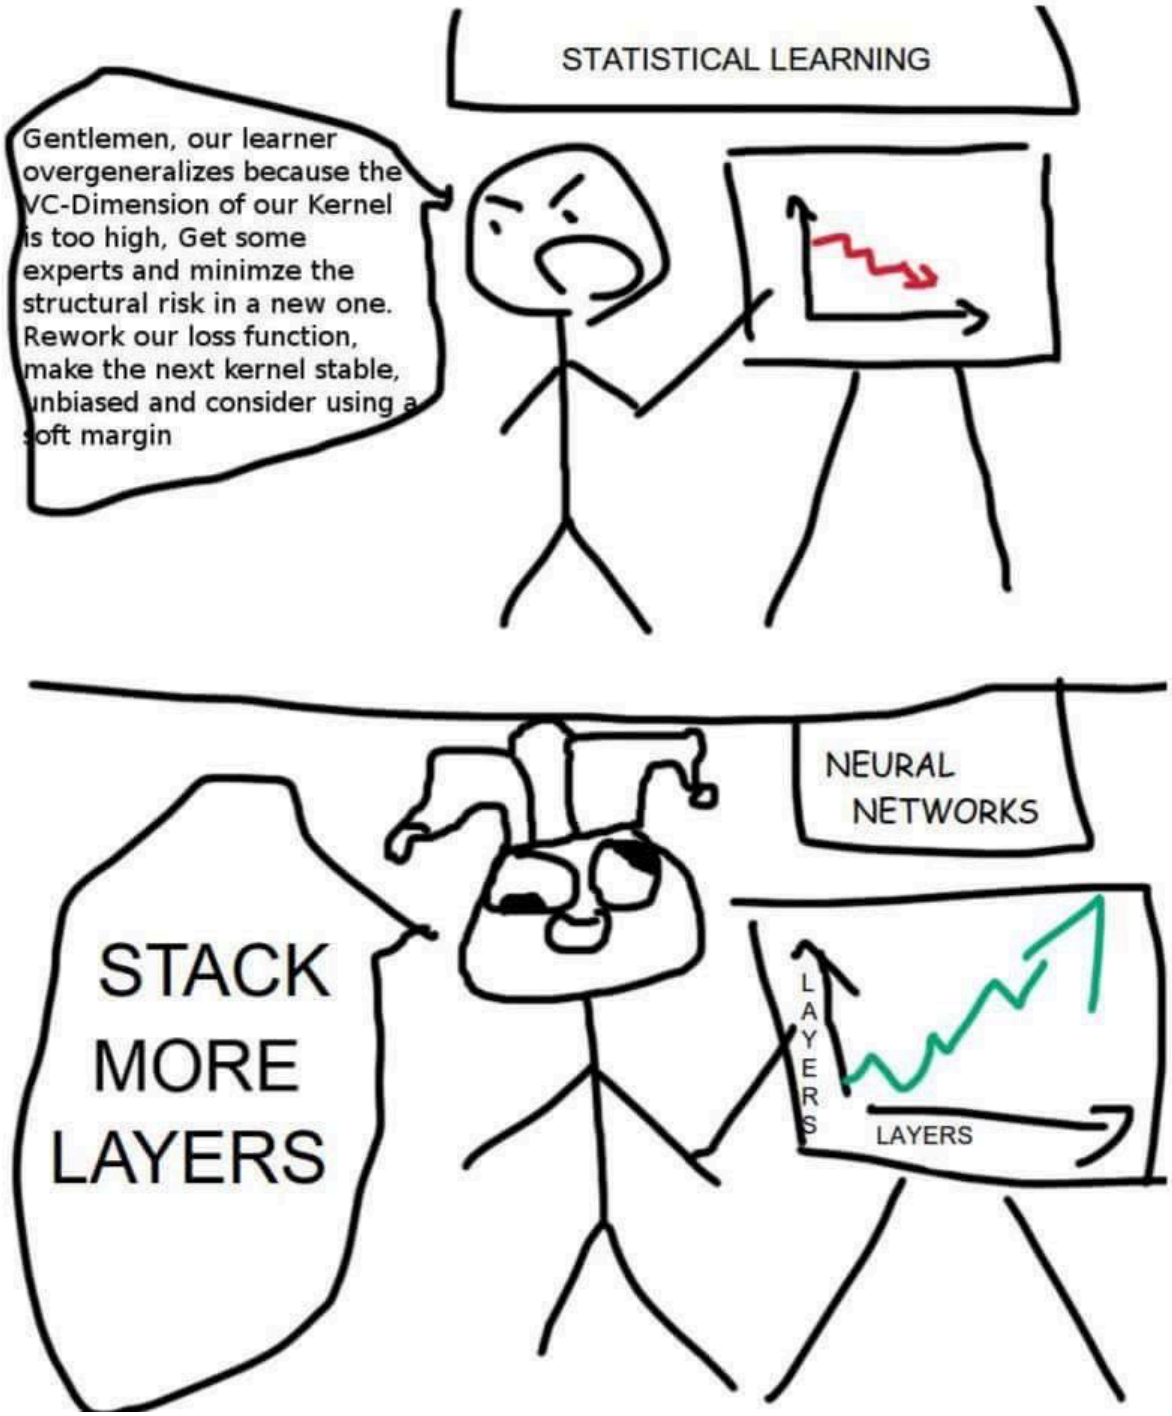
Awkwardly fast-walking across the street after the beep boops stop



Making your own beep boops by yelling "BEEP BOOP" and running across the street

This poor kid has no idea the harsh reality that is coming to him





STATISTICAL LEARNING
Gentlemen, our learner overgeneralizes because the VC-Dimension of our Kernel is too high, Get some experts and minimze the structural risk in a new one. Rework our loss function, make the next kernel stable, unbiased and consider using a soft margin
